

EquilinBALANCER, the roughage supplement

Fully organically bound mineral supplement with natural vitamin E and pre- and probiotics.

The essential roughage addition, The Balancers

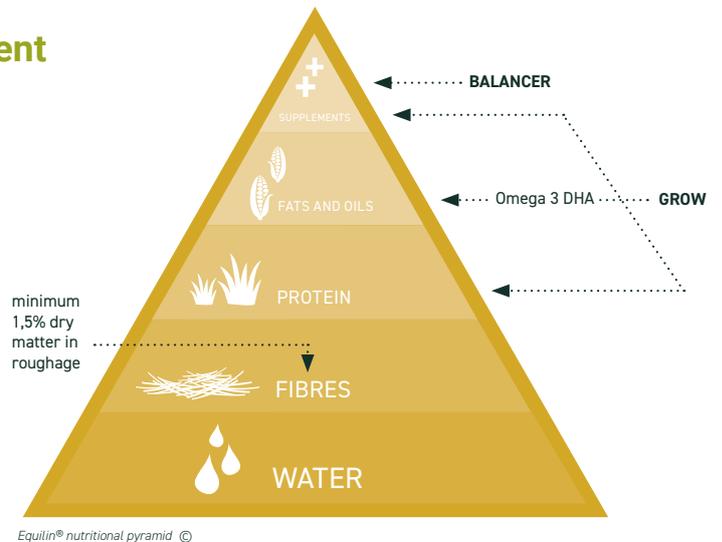

Every horse or pony needs easily absorbable minerals and possibly vitamins in addition to their roughage, as they are not found in the roughage in high enough quantities. In particular zinc, copper, selenium and vitamin E are a point of attention. These are found among others in the BALANCERS.

The BALANCERS maintain a healthy intestinal flora, they do not correct it.

This tasty pellet contains among others:

- Organic, easily absorbable minerals
- Pre- and probiotics for the digestion of sugars and protein
- Natural vitamin E, as well as A, B and D
- Omega 3 from linseed oil
- No added iron

Category winner 'Product of the year 2015'.
